Introduction

In this report we indicate how Eurosafes Solutions will provide support in the three main objectives within the safety at height management system:

1. Minimize work performed at height and create a safe (Work) environment.
2. Save costs responsively.
3. Create a reliable multi-year maintenance plan.

More than the sum of the parts

Together with our clients we ensure a safe environment whilst working at height without compromise. That is what Eurosafes Solutions stands for. To achieve this, we have developed the Safety at height Management system (SHMS). It is an integral safety concept that supports clients in:

1. Improving insight into your risk profile and safety level.
2. Minimizing the risks and therefore your liability
3. Increasing safety
4. Reducing the total cost of ownership
5. Increasing the buildings return on investment.
6. Optimizing processes for work at height to save time and money.
7. Improving company image.

By following the SHMS process, you can return greater results in terms of safety and finances.

Assets

Location	Access	Asset	Manufacturer	Risk rating (GYOR)	Comment
Building 1 Roof area 1	Door	Guardrail GR02-13	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 1	Door	Eyebolt (Single point anchor) EB01-EB08	MSA Latchways	Yellow	Standard, Harness, Lanyard, basic training.
Building 1 Roof area 1	Door	Gutters	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 1	Door	Chimney flue	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 1	Door	Windows	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 1	Door	Lightning protection	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 1	Door	Ventilation Shafts	N/A	Amber	Advanced, Harness, Lanyards, advanced training/work positioning required.
Building 1 Roof area 2	Door	Windows	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 2	Door	Guardrail GR27-GR30	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 2	Door	Eyebolt (Single point anchor) EB18-EB20	MSA Latchways	Yellow	Standard, Harness, Lanyard, basic training.
Building 1 Roof area 2	Door	Lightning protection	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 3	Door	Guardrail GR27-GR30	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 3	Door	Eyebolt (Single point anchor) EB18-EB20	MSA Latchways	Yellow	Standard, Harness, Lanyard, basic training.
Building 1 Roof area 3	Door	Ventilation Shafts	N/A	Amber	Advanced, Harness, Lanyards, advanced training/work positioning required.

Building 1 Roof area 3	Door	Windows	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 3	Door	Lightning Protection	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 4	Temp Ladder	Guardrail GR34	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 4	Temp Ladder	Skylights	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 4	Temp Ladder	Lightening protection	N/A	Green	Collective protection present, mandatory site PPE required.

Location	Access	Asset	Manufacturer	Risk rating (GYOR)	Comment
Building 1 Roof area 4	Temp Ladder	Chimney Flue	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 5	Fixed Ladder	Guardrail GR31	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 5	Fixed Ladder	Plant work	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 5	Fixed Ladder	Lightning protection	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 6	Fixed Ladder	Guardrail GR36	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 6	Fixed Ladder	Air conditioning units	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 6	Fixed Ladder	Air Ventilation Units	N/A	Red	No Fixed access, no fall protection present, SSOW required.
Building 1 Roof area 6	Fixed Ladder	Chimney	N/A	Red	No Fixed access, no fall protection present, SSOW required.
Building 1 Roof area 6	Fixed Ladder	Lightning protection	N/A	Red	No Fixed access, no fall protection present, SSOW required.

Building 1 Roof area 6	Fixed ladder	Lightning protection	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 7	Designated walking route	Guardrail GR32-33	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 7	Designated walking route	Lightning protection	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 7	Designated walking route	Chimney flue	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 8	Door	Guardrail GR20-24	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 8	Door	Eyebolt (Single point anchor) EB12-14	MSA Latchways	Yellow	Standard, Harness, Lanyard, basic training.
Building 1 Roof area 8	Door	Windows	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 8	Door	Lightning protection	N/A	Green	Collective protection present, mandatory site PPE required.

Location	Access	Asset	Manufacturer	Risk rating (GYOR)	Comment
Building 1 Roof area 8	Door	Ventilation Shaft	N/A	Amber	Advanced, Harness, Lanyards, advanced training/work positioning required.
Building 1 Roof area 9	Door	Guardrail GR23-26	Unknown	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 9	Door	Eyebolt (Single point anchor) EB15-17	MSA Latchways	Yellow	Standard, Harness, Lanyard, basic training.
Building 1 Roof area 9	Door	Windows	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 9	Door	Lightning Protection	N/A	Green	Collective protection present, mandatory site PPE required.
Building 1 Roof area 9	Door	Ventilation shaft	Unknown	Amber	Advanced, Harness, Lanyards, advanced training/work positioning required.

eurosafesolutions®

Safety at height

without compromise

Key	
Purple	Specialist (Rope access, SSOW etc.)
Red	SSOW Required - No collective or permanent height safety equipment installed
Amber	Advanced, Harness, Lanyards, advanced training/work positioning required.
Yellow	Standard, Harness, Lanyard, basic training
Green	Basic - Collective protection provided

Safety at **height**
without compromise

Area	Building 1/Roof area 1			Roof height	Approx 30m	
Access	Hatch	Door	Fixed Ladder	Temp Ladder	MEWP	Other
		x				

Access Comments

The roof areas are accessed on a case-by-case basis by site maintenance staff and contractors, this roof area is covered by collective protection and eyebolts (Single point anchors)

Both are within compliance.

Roof area accessed by Door

We advise no lone working on this roof.

Tasks	Comments
Gutter Cleaning/Maintenance	Gutters located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Lightning Protection Maintenance	Lightning Protection located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Chimney Flue Maintenance	Chimney Flues located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Window Cleaning/Maintenance	Windows located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Ventilation Shaft Access/maintenance	Ventilation shafts require specialist access therefore harness, Lanyards, advanced training/work positioning required.

Access Suggestions

A permit to work system could help control who goes on the roof area to ensure they understand the risk associated with this area and the procedures in place also to identify that the engineers/contractors are trained and competent and that their RAMS are identified and suitable for the works required of them regarding access methods/Rescue.

We suggest that anyone going to the roof areas should always work in pairs in case of an emergency, this roof area is covered by collective protection and single point anchors, mandatory site PPE as specified by Coventry University required.

For access to the ventilation shafts specialist training and PPE is required. This will be determined by a SSOW.

Area	Building 1/Roof area 2			Roof height	Approx 25m	
Access	Hatch	Door	Fixed Ladder	Temp Ladder	MEWP	Other
		x				

Access Comments

The roof areas are accessed on a case-by-case basis by site maintenance staff and contractors, this roof area is covered by collective protection and eyebolts (Single point anchors)

Both are within compliance.

Roof area accessed by Door

We advise no lone working on this roof.

Tasks	Comments
Lightning Protection Maintenance	Lightning Protection located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Window Cleaning/Maintenance	Windows located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Ventilation Shaft Access/Maintenance	Ventilation Shafts require specialist access therefore harness, Lanyards, advanced training/work positioning required.

Access Suggestions

A permit to work system could help control who goes on the roof area to ensure they understand the risk associated with this area and the procedures in place also to identify that the engineers/contractors are trained and competent and that their RAMS are identified and suitable for the works required of them regarding access methods/Rescue.

We suggest that anyone going to the roof areas should always work in pairs in case of an emergency, this roof area is covered by collective protection and single point anchors, mandatory site PPE as specified by Coventry University required.

For access to the ventilation shafts specialist training and PPE is required. This will be determined by a SSOW.

Access	Hatch	Door	Fixed Ladder	Temp Ladder	MEWP	Other
				x		

Access Comments

The roof areas are accessed on a case-by-case basis by site maintenance staff and contractors, this roof area is covered by collective protection in the form of guardrail.

Guardrail is within compliance.

Roof area accessed by Temporary ladder, therefore additional consideration is to be taken regarding rescue and evacuation.

We advise no lone working on this roof.

Tasks	Comments
Lightning Protection Maintenance	Lightning Protection located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Skylights Cleaning/Maintenance	Skylights located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Chimney Flue Maintenance	Chimney Flues located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.

Access Suggestions

A permit to work system could help control who goes on the roof area to ensure they understand the risk associated with this area and the procedures in place also to identify that the engineers/contractors are trained and competent and that their RAMS are identified and suitable for the works required of them regarding access methods/Rescue.

We suggest that anyone going to the roof areas should always work in pairs in case of an emergency, this roof area is covered by collective protection, mandatory site PPE as specified by Coventry University required.

Area	Building 1/Roof area 5			Roof height	Approx 8m

Access	Hatch	Door	Fixed Ladder	Temp Ladder	MEWP	Other
			x			

Access Comments

The roof areas are accessed on a case-by-case basis by site maintenance staff and contractors, this roof area is covered by collective protection in the form of guardrail.

Guardrail is within compliance.

Roof area accessed by fixed ladder, therefore additional consideration is to be taken regarding rescue and evacuation.

We advise no lone working on this roof.

Tasks	Comments
Lightning Protection Maintenance	Lightning Protection located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.
Plant Work Maintenance	Plant Work located within the confines of the of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.

Access Suggestions

A permit to work system could help control who goes on the roof area to ensure they understand the risk associated with this area and the procedures in place also to identify that the engineers/contractors are trained and competent and that their RAMS are identified and suitable for the works required of them regarding access methods/Rescue.

We suggest that anyone going to the roof areas should always work in pairs in case of an emergency, this roof area is covered by collective protection, mandatory site PPE as specified by Coventry University required.

Area	Building 1/Roof area 6			Roof height	Approx 6m	
------	------------------------	--	--	-------------	-----------	--

Access	Hatch	Door	Fixed Ladder	Temp Ladder	MEWP	Other
			x			

Access Comments

The roof areas are accessed on a case-by-case basis by site maintenance staff and contractors, this roof area is covered by collective protection in the form of guardrail.

Guardrail is within compliance.

Roof area accessed by Fixed ladder, therefore additional consideration is to be taken regarding rescue and evacuation.

We advise no lone working on this roof.

Tasks	Comments
Lightning Protection Maintenance	Lightning Protection located both within & outside the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection. Any requirements to venture outside of the guardrail will require additional training/equipment/SSOW.
Air Ventilation Maintenance	Air Vents located outside the confines of the collective protection, SSOW Required no collective or permanent height safety equipment installed.
Chimney Flue Maintenance	Chimney Flues located outside the confines of the collective protection, SSOW Required no collective or permanent height safety equipment installed.
Air Conditioning Unit Maintenance	Air Conditioning Units located within the confines of the collective protection, these are to be maintained whilst staying in the confines of the collective protection.

Access Suggestions

A permit to work system could help control who goes on the roof area to ensure they understand the risk associated with this area and the procedures in place also to identify that the engineers/contractors are trained and competent and that their RAMS are identified and suitable for the works required of them regarding access methods/Rescue.

We suggest that anyone going to the roof areas should always work in pairs in case of an emergency, this roof area is covered by collective protection, mandatory site PPE as specified by Coventry University required.

Any requirements to venture outside the confines of the guardrail will require an SSOW, the install of additional equipment would benefit here.

For access to the ventilation shafts specialist training and PPE is required. This will be determined by a SSOW.

PPE Requirements

Building/Roof area	PPE Requirements	Comments
Building 1/ Roof 1	Mandatory site PPE, Harness, Lanyard, and work positioning.	Mandatory site PPE (specified by Coventry University) Harness, Lanyard, and work positioning for use in conjunction with single point anchors. To be defined in SSOW.
Building 1/ Roof 2	Mandatory site PPE, Harness, Lanyard, and work positioning.	Mandatory site PPE (specified by Coventry University) Harness, Lanyard, and work positioning for use in conjunction with single point anchors. To be defined in SSOW.
Building 1/ Roof 3	Mandatory site PPE, Harness, Lanyard, and work positioning.	Mandatory site PPE (specified by Coventry University) Harness, Lanyard, and work positioning for use in conjunction with single point anchors. To be defined in SSOW.
Building 1/ Roof 4	Mandatory site PPE	Mandatory site PPE (specified by Coventry University)
Building 1/ Roof 5	Mandatory site PPE	Mandatory site PPE (specified by Coventry University)
Building 1/ Roof 6	Mandatory site PPE	Mandatory site PPE (specified by Coventry University)
Building 1/ Roof 7	Mandatory site PPE	Mandatory site PPE (specified by Coventry University)

Building 1/ Roof 8	Mandatory site PPE, Harness, Lanyard, and work positioning.	Mandatory site PPE (specified by Coventry University) Harness, Lanyard, and work positioning for use in conjunction with single point anchors. To be defined in SSOW.
Building 1/ Roof 9	Mandatory site PPE, Harness, Lanyard, and work positioning.	Mandatory site PPE (specified by Coventry University) Harness, Lanyard, and work positioning for use in conjunction with single point anchors. To be defined in SSOW.

Please note that the PPE regulations state that the employer must provide suitable training and instruction for the equipment provided. All operatives be suitably trained in the safe use of any equipment provided

-----------	------------------------	-------------	-------------

Rescue
50m IKAR Rescue kit

Comments
Rescue kit required when working with ventilation shafts, areas covered with collective protection would not require this rescue kit although considerations should be made regarding evacuation.

Training

Those working on a roof need to have the appropriate knowledge, skills, and experience to carry out the work safely and competently. Those who are less experienced will require supervision by a competent person. Competency is an ongoing process which is developed through work experience and regular training. Training for roof workers should include relevant health and safety disciplines for working at height.

Rescue training must be provided by carrying out a simulated rescue where safe to do so.

Comments
Anyone accessing the roof areas contained within this report, must have undergone appropriate training required for the task being carried out.
Should an emergency rescue be required then operatives should be trained on the equipment required.

Summary

Large amounts of this building's roof areas are covered by collective protection, Special considerations are to be made for access to the ventilation shafts where advanced training requirements are essential.

Roof 6 presents areas that contain serviceable assets although are not covered by any means of fall protection. The install of additional fall protection would benefit in these areas.
